WEB DEVELOPMENT

About Me

Hello! My name is Hakimi, and I am a passionate web developer with a strong background in creating modern and responsive websites. With experience in HTML, CSS, JavaScript, and various web development frameworks like React.js and Tailwind CSS, I specialize in crafting efficient, user-friendly web applications.

Experience

Frontend Development

- Frontend Development: Developed user-friendly interfaces using modern tools such as HTML5, CSS3, JavaScript, and frameworks like React.js to build responsive and interactive web applications.

Backend Development

- Backend Development: Worked with Node.js and Express to develop robust server-side applications. Built RESTful APIs to handle client-server communication and data management.

Database Management

- Backend Development: Worked with Node.js and Express to develop robust server-side applications. Built RESTful APIs to handle client-server communication and data management.
